MIKE OTHITIS. B.S.c Double Majors, Natal R.S.A.

We have a close working relationship with our neighbor Mine, Falgold, Dalny Mine, Chakarí, which is situated, 18 kilometers down the road from us. Both Mines are Gold Mines, with particular respect to Geology.

Golden Valley Mine, have had the pleasure and privilege of working and associating with prominent Geologists, like, R.P. Foster and A.G.Mann.

Mike Othitis as been involved in Geological Consulting for the Golden Valley Mine, since 1985 through 1991, being employed by Falgold and seconded to us.

We found him more than equal in following in the footsteps of his prominent predecessters and am unable to fault his work.

I highly recommend him not only for his Geological capabilities but also his attributes that go to make him, I say, an extremely good employee. Which, you no doubt will find out for your self.

WE wish him well and all the very best in the New World.
